

Testing Rates vs GDP per Capita

Higher GDP countries generally conducted more tests per capita

Testing Rates vs COVID Cases per 100k Population

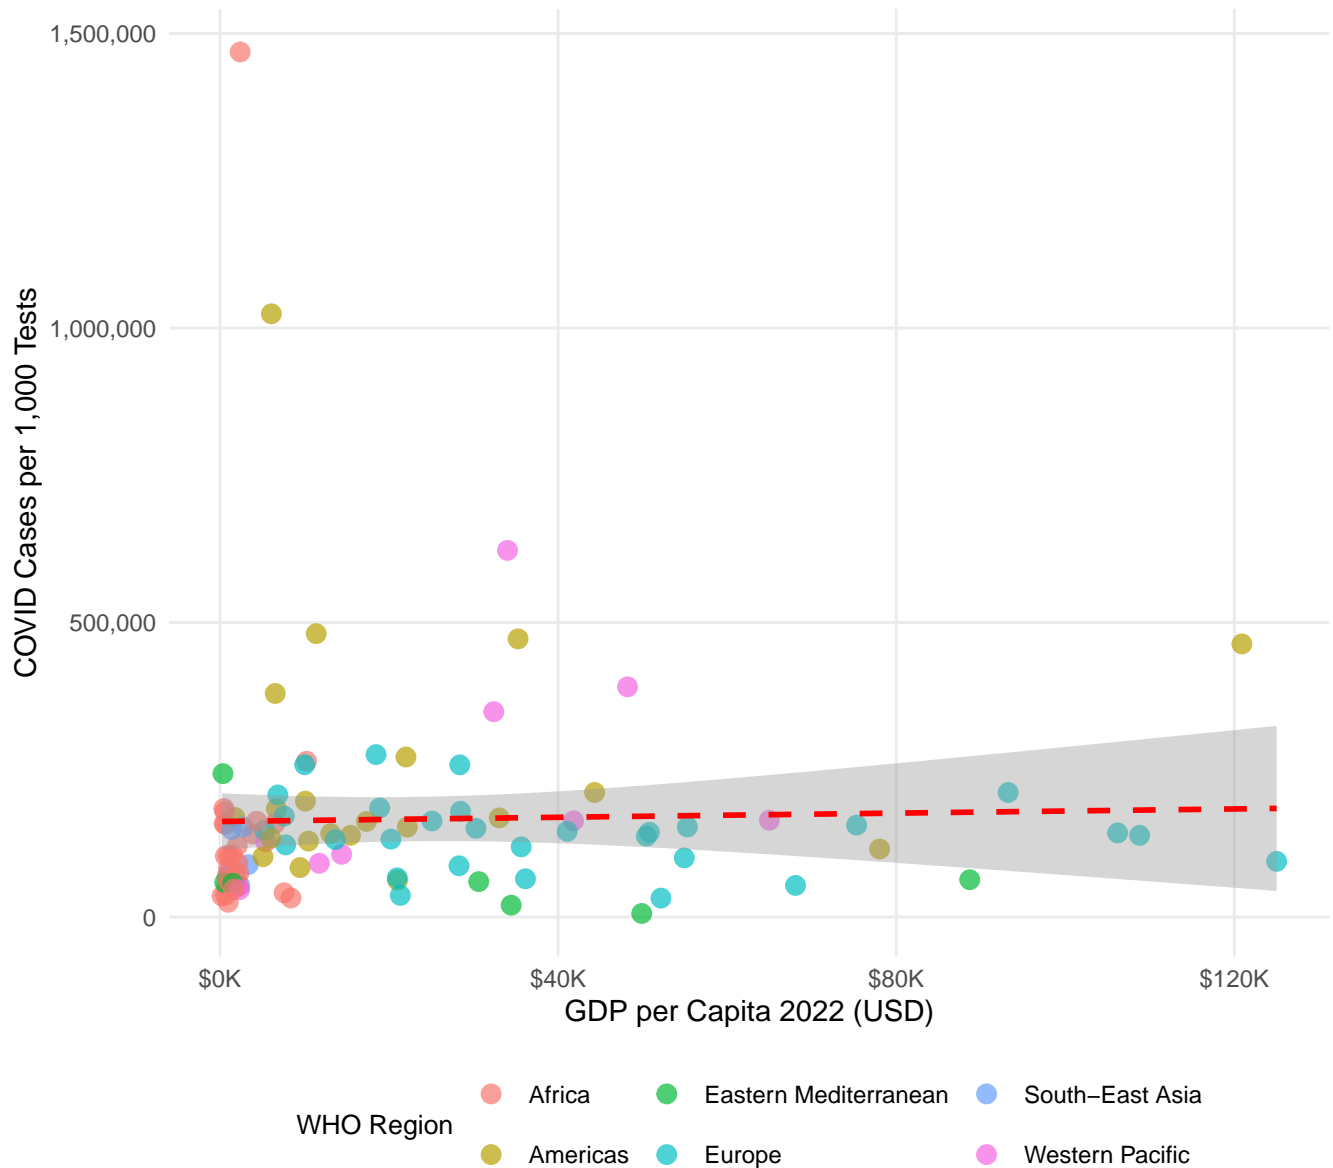

More testing generally leads to higher reported case rates

Data sources: WHO COVID data and Our World in Data testing data

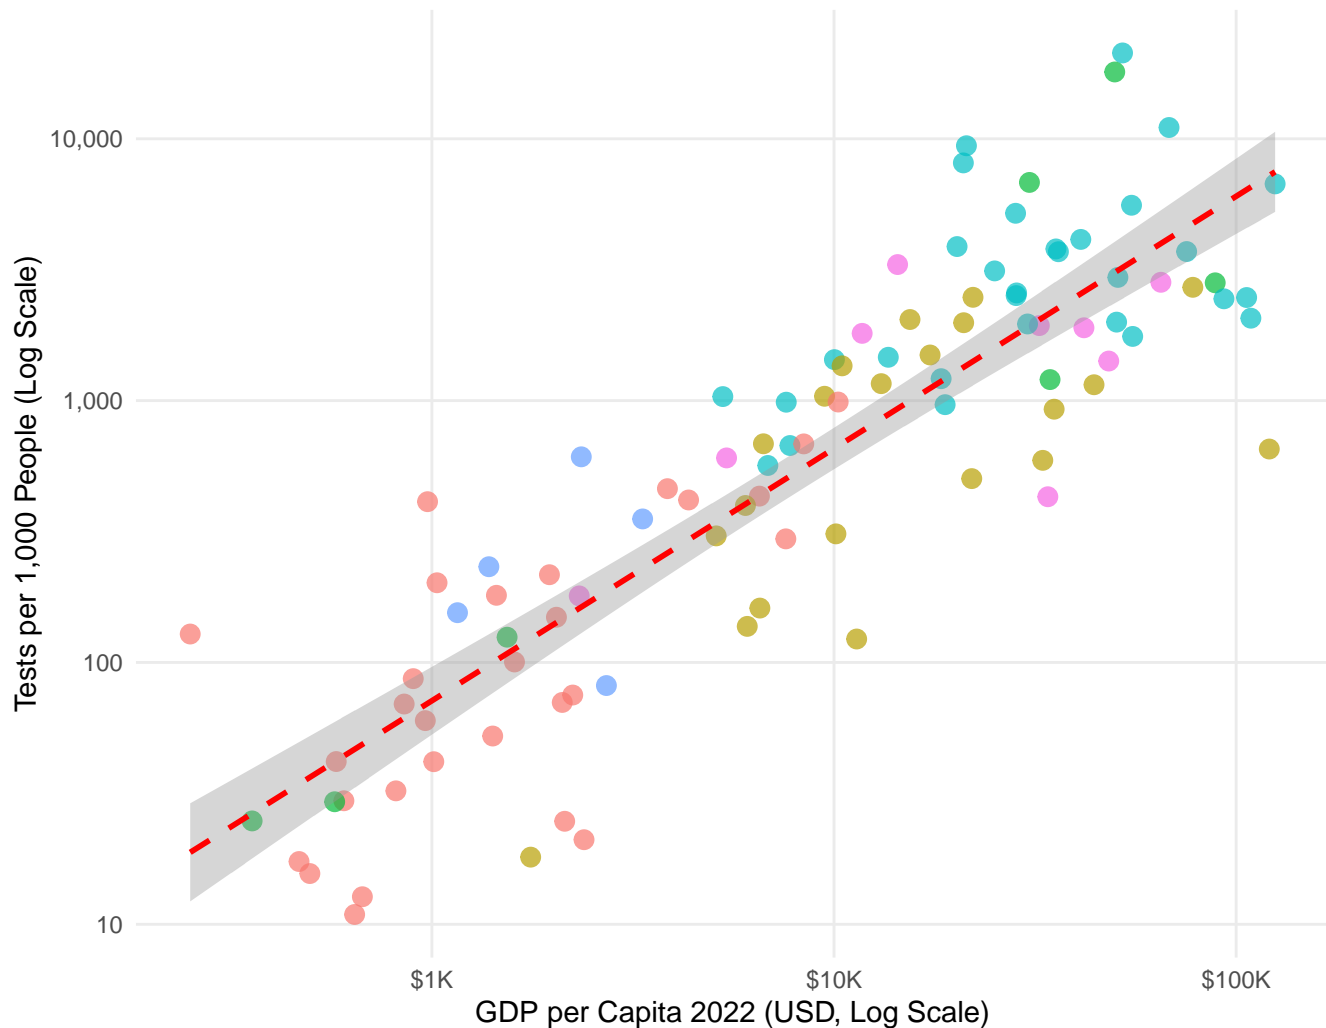

COVID Cases per 1,000 Tests vs GDP per Capita

Testing efficiency: Lower values indicate more comprehensive testing

Testing Rates vs GDP per Capita (Log Scale)

Both axes on logarithmic scale for better visualization

WHO Region

Africa

Eastern Mediterranean

South-East Asia

Americas

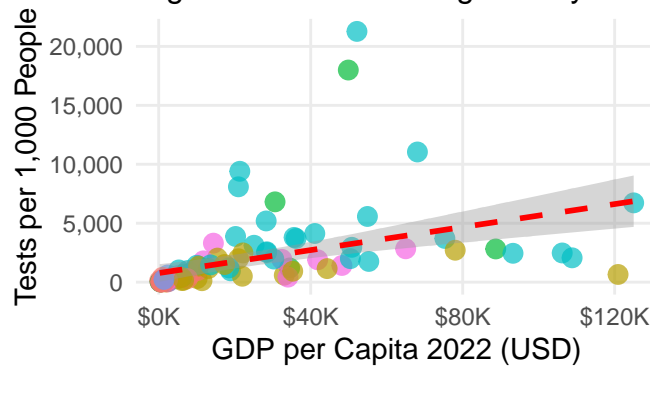

Europe

Western Pacific

Data sources: WHO COVID data, World Bank GDP data, Our World in Data testing data

Testing Rates vs GDP per Capita

Higher GDP countries generally conducted more testing per capita

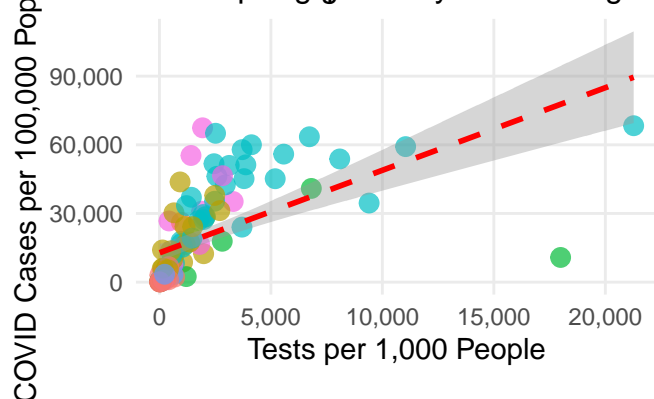

WHO Region

Data sources: World Bank GDP data, Our World in Data testing data

Testing Rates vs COVID Cases

More testing generally leads to higher COVID cases

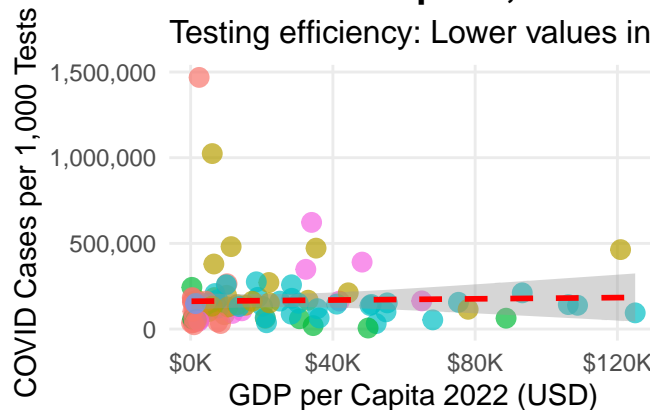

WHO Region

Data sources: WHO COVID data and Our World in Data testing data

COVID Cases per 1,000 Tests vs GDP per Capita

Testing efficiency: Lower values indicate more comprehensive testing

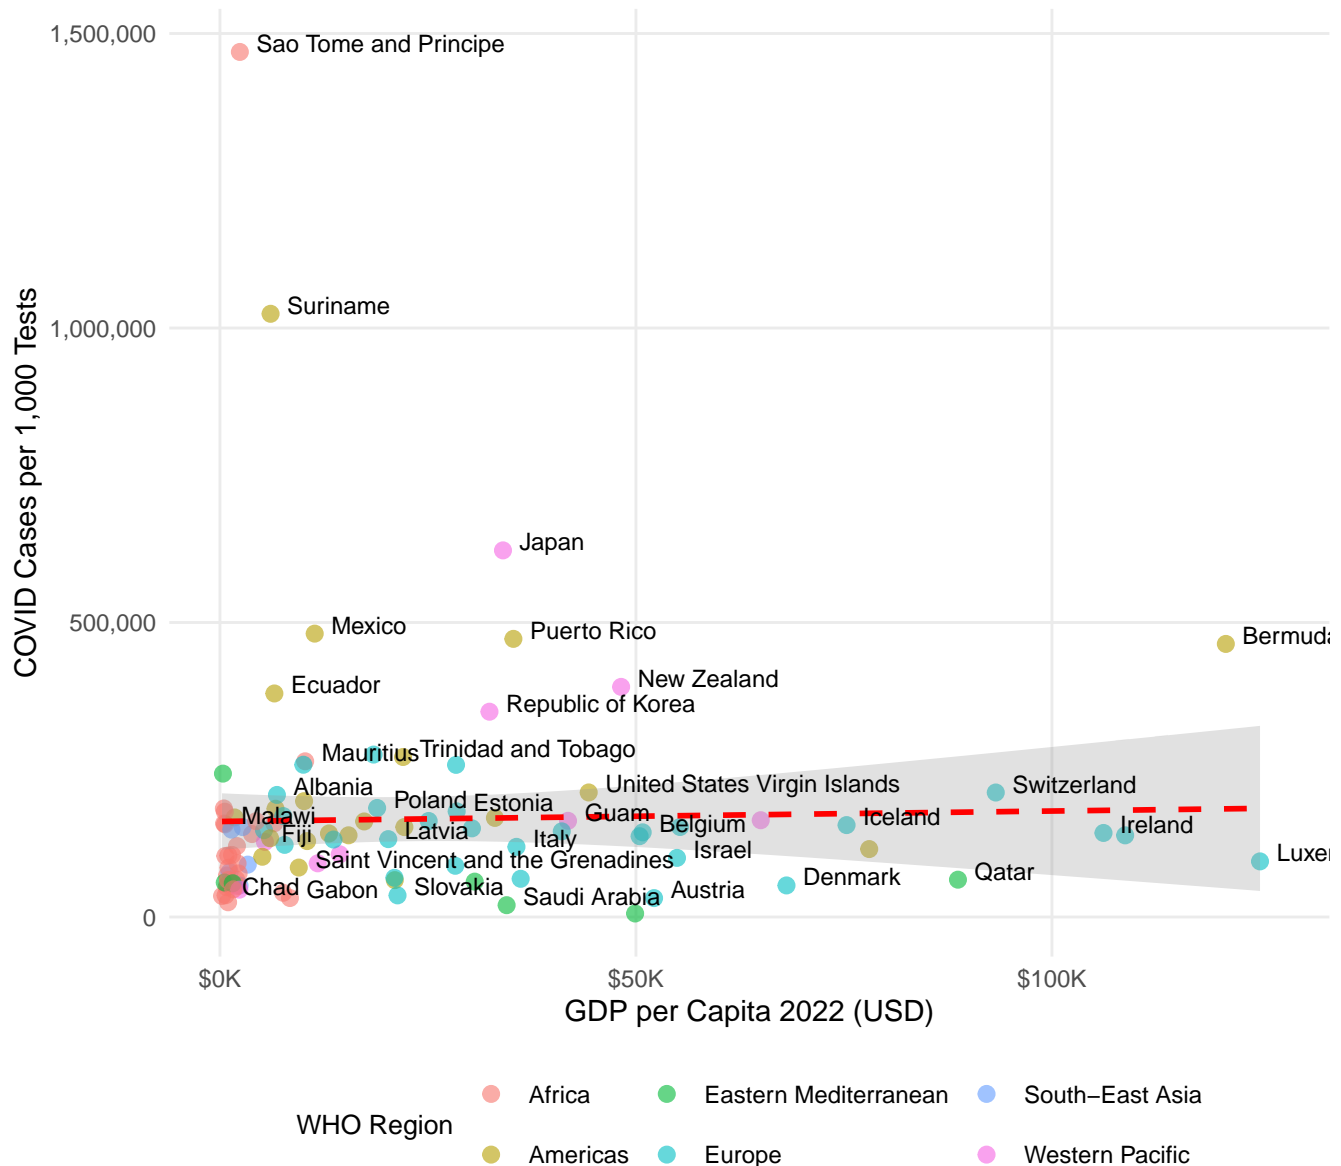

WHO Region

Data sources: World Bank GDP data, Our World in Data testing data

Testing Efficiency vs GDP with Country Labels

Countries with extreme testing efficiency values are labeled

Lower values indicate more comprehensive testing strategies
